

## Fortemide / 1050G

Hot melt polyamide adhesive in granule form developed for folding up and beading work with natural and synthetic materials.

Fortemide: is supplied in regular shape granules; it has high temperature stability in the melting pot and offer good flexibility. This product contains no toxic ingredients.

### Technical characteristics:

Gardner colour < 8

Softening point 100 – 110 °C

Specific gravity 0,98 g/cm<sup>3</sup>

Brookfield viscosity @ 160°C 1800 - 2800 mPa.s

Working temperature 135 - 155 °C

### Storage:

In usual storage condition the material is stable for 6 months minimum.
