

Fortemide / 1690F

High quality hot melt super polyamide adhesive recommended in the shoe industry for lasting operation, (mainly for side lasting machine), requiring short setting time.

Fortemide: gives excellent adhesion to different types of materials for the construction of shoes. This product contains no toxic ingredients.

Technical characteristics:

Softening point 167 –171 °C

Specific gravity 0,98 g/cm³

Rod diameter 3.9± 0.05 mm

Brookfield viscosity @ 232°C 3300 – 3700 mPa.s

Elongation at break 600%

Working temperature 190 – 210 °C

Storage:

In usual storage condition the material is stable for 6 months minimum.
